

CHEO Camp Otonabee 2017

Camp Otonabee is a summer camp approved for cardiac kids in partnership with CHEO cardiology.

The 2017 camp will be held August 14th - 18th, is a great opportunity for kids with various cardiac conditions to have fun, experience camp life, meet new friends, and make wonderful memories, all while in a safe environment. This 1-week day camp will be filled with activities such as swimming, canoeing, high ropes course, climbing wall, outdoor group activities, and crafts, all adaptable according to the child's health. The camp includes both day camps as well as overnight camp.

We are very excited that the CCHA-Eastern Ontario chapter will be participating in this year's camp!
